Summary

Aspiring software developer with strong skills in Java, Python, and full-stack web development. Experienced in building real-time applications, machine learning models, and Android apps through academic projects and internships. Completed multiple certifications in Java, IoT, MongoDB, Agile Mindset, and Android Development. Passionate about problem-solving, clean code, and continuous learning.

Technical Skills

Frontend : HTML, CSS, JavaScript, React.js, Bootstrap
Backend : Node.js, FastAPI

Languages : Java, Python, JavaScript
Databases : MySQL, MongoDB

Projects

Online Voting Platform

The project focused on providing a secure, user-friendly platform with real-time vote tracking and authentication.

Implemented responsive UI/UX and backend validation to ensure data integrity and prevent fraud. Focused on accessibility and user authentication.

Tech Stack: HTML, CSS, JS, Bootstrap, React, Node.js, MySQL

AI Symptom Analyzer Bot

Created an intelligent chatbot capable of analyzing user-described medical symptoms and suggesting potential conditions.

Leveraged machine learning models and natural language processing (NLP) to interpret symptoms and deliver meaningful feedback.

Tech Stack: HTML, CSS, JS, Fast API

AI Powered Mock Interview Platform

Developed an AI-driven platform that simulates real interview scenarios for students. Features include voice-based mock interviews, aptitude training with re-explanations and group discussion practice.

Tech Stack: HTML, CSS, JS, React.js, Fast API

Education

Sri Manakula Vinayagar Engineering College

May 2022 –

Current

Bachelor of Technology in Computer Science and Engineering: GPA-7.74

Puducherry

Krishnaswamy Memorial Matriculation Higher Secondary School

- Higher Secondary (12th standard) – **74%**
2022

May

- Secondary (10th standard) – **94%**
2020

March

Certifications

- NPTEL – Programming in Java (Elite)
- NPTEL – Introduction to IoT (Elite)
- Android Developer Virtual Internship – AICTE & EduSkills
- Introduction to MongoDB for Students
- Infosys Springboard – Building an Agile Mindset
- Infosys Springboard: Networking and Web Technology.

Internship

Android Developer Virtual Intern – AICTE & EduSkills Jan 2025 – Mar 2025

Learned Android fundamentals, Kotlin basics, layouts, API handling

Built mini projects and completed weekly assignments

Achievements

- Achieved **Top 10 finalist** position at VOID Hacks 2023, Bengaluru, for developing an innovative online voting system.
- Participated in Hack Day 1.0, Pondicherry, and built an **AI-based health assistant bot** for symptom analysis.
- Selected to compete in multiple national-level hackathons, demonstrating **strong problem-solving and technical skills**.
